

CHANGE. STREAMLINE. SERVE.

Hospital Management with Idhasoft solutions and IBM Smart Business.

Providing an extraordinary standard of healthcare to the ordinary man is anything but easy. The number of patients is large. Healthcare standards keep changing. As do government regulations. And patients are always looking for more affordable healthcare services. One way to stay ahead of your competition is to streamline your business operations with the administrative and clinical services of your hospital.

Idhasoft brings you iHMIS® and iPACS®, two IT solutions that'll make your hospital more efficient. iHMIS® streamlines your core business, allowing you to focus on the clinical aspects of your hospital. iPACS® simplifies the process of archiving medical images, thus speeding up your healthcare services delivery. iHMIS® and iPACS® are affordable and highly compatible with other applications.

iHMIS® is a web-based Hospital Management Solution developed by Altus Systems Pvt. Ltd., a subsidiary of Idhasoft Pvt. Ltd. It streamlines administrative, clinical and support services for hospitals with multiple branches and those that need to be integrated with e-health systems. It is highly flexible and will respond to your hospital's changing needs. iHMIS® can cater to the needs of several healthcare delivery systems, including hospitals with bed capacity ranging from 50 to 2000 beds.

Features of iHMIS®

- Enhanced patient satisfaction through efficient processes
- Enables faster retrieval of medical records
- Avoids duplication of efforts
- Enables better manpower utilisation
- Offers better control over resources
- Reduces operation costs
- Achieves compliance with international standards with minimal effort

Solutions Showcase of iHMIS®

- Modular, catering to every function in a hospital
- Flexible! Buy a comprehensive solution or select only those modules that you need
- Allows user level security administration, and function restrictions based on access rights provided.
- Maintains a log of a set of actions performed, based on the access privileges given to each user
- Accommodates barcode, RFID and SmartCard technologies
- Supports all international coding standards such as ICD 10, CPT, HCPCS, SNOMED, etc
- Compliant with e-Security Solutions and interfaces with medical equipment based on HL-7
- Integrates with third-party applications including Laboratory Information Management (LIMS), EDI and Payment Gateways
- The system integrates the best healthcare practices for small, medium and large hospitals, at a single or multiple sites

iPACS®

Quick decisions are crucial to quality healthcare. Which is why medical images and reports should be made available to doctors within minutes of completing the investigation. iPACS is a Picture Archiving and Communication System from Idhasoft. It enables images such as X-rays and scans to be stored and viewed electronically. So that doctors and other healthcare professionals can access information at the touch of a button. iPACS is easy to use and available at an attractive price.

Features of iPACS®

- Replaces hard-copy medical images, such as films, offering a growing cost & space advantage
- Digitally stores the medical images, irrespective of the originating instrument, into a central database, for later retrieval
- Increases speed and quality of reporting
- Allows image manipulation such as crop, rotate, zoom, brightness, contrast, etc
- Multiple copies of the same images can be available in different departments at the same time
- Enables practitioners to efficiently access the medical images simultaneously, irrespective of their geographical location, thus decreasing the transportation costs of medical records/ practitioner
- Eliminates physical and time barriers associated with traditional film-based image retrieval, distribution and display
- Provides a single point of access for images and associated data

Powered by IBM Smart Business

Idhasoft iHMIS® and iPACS® solutions now come to you in an exclusive package powered by IBM Smart Business. A new, simple and cost-efficient way to install, run and manage business management solutions for your business.
